- PRODUCT QUALITY COMPLIES WITH THAI PEROXIDE SPECIFICATION.

We are Committed to Remain our Customers' Most Valued Supplier
BIRLOX-12
(Peracetic Acid 12%) 

AN ENVIRONMENTALLY SAFE - VERSATILE ANTI-MICROBIAL AGENT & A POWERFUL OXIDANT

Description: A water-like clear, colourless liquid. An aqueous equilibrium solution containing peracetic acid, hydrogen peroxide, acetic acid and special stabilizers. This product is considered environmentally safe since it decomposes to acetic acid and oxygen. Acetic acid is completely biodegradable.

Formula: CH₃ COOOH (CAS# 79-21-0)

Synonyms: Peroxy acetic Acid, Acetyl Hydroperoxide

Physical Data:
- Form: Liquid
- Color: Clear, Colorless
- Odor: Strong, purgant
- Sp. Gravity @ 20°C: 1.0
- pH - value (1% solution): 7.0 - 2.0
- Miscible in all proportions with: water

Chemical Composition:
- Peracetic acid (Mn): 12%
- Hydrogen Peroxide (Mn): 14%
- Acetic Acid, Stabilizers, water: Balance

Product performance: Best if used within 6 months and stored at 34°C MAX

Standard Packaging: 30 kg. and 200 kg. polyethylene drums with air-tight type cap

### Established Applications of Peracetic Acid

**Note:** Precleaning of all surfaces to remove soils is critical to achieve effective disinfection and sterilization.

**Handling & Storage:**
- Safe handling advice: Never return unused material to storage receptacle. Avoid exposure. Provide appropriate exhaust ventilation. Wear suitable protective clothes. Open drum/container carefully. Content may be under pressure.
- Technical measures/Precautions: Keep away from sources of ignition. No smoking. Keep away from combustible material. Protect from Contamination. Do not heat over +30°C.
- Storage: Keep in a cool, well-ventilated place. Keep away from heat, direct sunlight and sources of ignition. Store in original container equipped with a vent.
- Incompatible products: Metal chlorides, bases, reducing agents, organic materials, contamination.
- Spills clean up: Dam up. Flush very dilute solution into sewer with plenty of water. Never return spills in original containers for reuse.

**Transport Information:**
- UN No: 3109
- ADR class: 5.2, organic peroxide type F, liquid
- Packing Group II
- Harmonized Code: 2915.29

**Hazard Identification:**
- Oxidizing, causes severe burns. May cause fire. Harmful by Inhalation, In contact with skin and if swallowed.

**First Aid Measures:**
- Inhalation: Remove from exposure, lie down. Keep warm. Oxygen or artificial respiration if needed. Obtain medical attention.
- Skin contact: Wash off immediately with plenty of water removing all contaminated clothes and shoes. If skin irritation persists, call a physician.
- Eye contact: Rinse immediately with plenty of water for at least 15 minutes and seek medical advice.
- Ingestion: Rinse mouth with water. Drink plenty of water. Do not induce vomiting. Call a physician immediately.

**Fire Fighting Measures:**
- Suitable extinguishing media: Water, spray. Do not use dry chemical/powder type.
- Specific hazards: Contact with combustible material may cause fire. Heating >110°C may cause an explosion.
- Protective equipment for firefighters: Wear a self contained breathing apparatus, suit protecting against chemicals.

**Suitable Materials of Construction:**
- Laboratory equipments: Glass
- Vessels, pipes, pumps & valves: SS-304 L, SS-316 L
- Gaskets: PE, PTFE, Viton, Silicon, PP

**Disclaimer:**

The information submitted in this publication is based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve processors of the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.

Precautionary Information

Health:
Liquid is corrosive to the eye and skin, and direct eye contact may cause irreversible tissue damage, including blindness. Inhalation of mist or vapor will cause severe irritation of lungs/throat and nose that usually subsides after exposure ceases. Swallowing may produce corrosion (burning) of the gastrointestinal tract that may be life-threatening.

Physical:
Initiates combustion in other materials by causing fire through release of oxygen.

Ingredients

Peracetic acid (PAA) CAS-No. 79-21-0
Hydrogen peroxide (H2O2) CAS-No. 7722-84-1
Acetic acid CAS-No. 64-19-7

Flash Point: > 80°C
Autoignition: No data available
Temperature:
Extinguishing Media: Water / Spray
Special Fire Fighting Procedures: Any tank or container surround ed by fire should be flooded with water for cooling. Wear full protective clothing and certified self-contained breathing apparatus.

Degree of Fire and Explosion Hazard: Contact with combustible material may cause fire. Heating >110°C may cause an explosion.

Conditions To Avoid: Excessive heat / contamination of any kind / Open flames

Major Contaminants that contribute to instability: Combustible material, reducing- agents, organic materials, metal chlorides, basses, rust, Dirt

Incompatibility: Dirt, alkali, organics, leather, paper, wood, and heavy metals

Routes of Exposure

Eye Contact: Extremely irritating corrosive (rabbit)
Skin Contact: Mildly irritating (rabbit)
Skin Absorption: No significant hazard (rabbit)
Inhalation: TWA (ACGIH) - H2O2, 1 ppm
- Acetic Acid 10 ppm
Ingestion: Moderately hazardous (rat).
LD 50 is between 225 to 1200 mg/kg.

Effects of Over Exposure

Severe irritant to eyes, nose, throat, lungs and gastrointestinal tract. May cause irreversible tissue damage to the eyes.

Physical Data

Boiling Point: ca 105°C
Appearance and state: Clear, colorless, liquid
Odor: Pungent
Specific Gravity
- 20°C 1.0
Solubility in water 100
% by Weight: pH (as is):

Material Safety Data

FIRST AID MEASURES:
Inhalation: Remove from exposure, lie down. Keep warm. Oxygen or artificial respiration if needed. Obtain medical attention.

Skin contact: Wash off immediately and plenty of water. Remove all contaminated clothes and shoes. If skin irritation persists, call a physician.

Eye contact: Rinse immediately with plenty of water for at least 15 minutes and seek medical advice.

Ingestion: Rinse mouth with water. Drink plenty of water. Do not induce vomiting. Call a physician immediately.

Notes to Doctor: This product can be corrosive to skin, eyes and mucous membranes. Consideration should be given to careful endoscopy as stomach or esophageal burns, perforations or strictures may occur. Careful gastric lavage with an endotracheal tube in place should be considered. Observation may be warranted. Treatment is controlled removal of exposure followed by symptomatic and supportive care.

Special Protection
Ventilation: Ensure adequate ventilation, esp. in confined area.

Recommended Personal Protective Equipment
Respiratory: In case of insufficient ventilation wear suitable respiratory equipment.
Eyes: Tightly fitting safety goggles and face shield. Eye wash bottle with pure water
Hand: Viton gloves. Do not wear leather / cotton gloves (risk of fire)
Skin: Full protective chemical resistant clothing. Do not wear leather shoes.

Emergency Accident
Precautions and Procedure: Keep people away. Wear full protective clothing. Use water only for fire.

Storage and Handling
Avoid excessive heat, direct sunlight and sources of ignition. Avoid contamination of any kind. Keep away from combustible materials. No smoking. Provide appropriate exhaust ventilation. Wear suitable protective clothes. Open drum / container carefully. Content may be under pressure. Store in original container equipped with a vent. Never return unused material to original container. Empty drums should be rinsed in water before discarding.

Disposal, Spill or Procedures
Procedure for Release of spill: Personal precautions: Avoid contact with skin, eye and clothing. Never return spills in original containers for reuse. Ensure adequate ventilation. Use personal protective equipment. Remove all sources of ignition. Keep people away from and unwind of spill / leak. Methods of cleaning up: Dam up. Flush very dilute solution into sewer with plenty of water. Contact the proper local authorities. Never return spills in original containers for reuse.

Disposal Considerations
Contaminated packaging

Waste from Residues / unused products
See accidental release measures.

Transportation
Precautions
Container should be stacked properly in transit, make sure to keep drums in upright position.
UN Number: 3109 IBC max 1.5 m³
3119 Tanks max 20 tn
Class 5.2
Packing Group II

Type of Packages
30 kg. and 200 kg. Polyethylene drums with vented type cap
